### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The Applicant claims an integral polymeric membrane comprising a polymeric sheet comprising porous structure with a microstructure of nodes and fibrils and an interior volume of the porous structure between the nodes and fibrils, the sheet having distributed in the nodes and fibrils of the sheet a metal, an organic polymer, or a combination, and the interior volume of the structure comprising a porosity of the sheet of the polymeric sheet greater than 35% and substantially occluded by an ion-exchange resin to provide ionic conductance. Applicant claims a polymeric membrane comprising a polymeric sheet comprising porous structure with a microstructure of nodes and fibrils, fumed silica distributed in the nodes and fibrils of the sheet, and electrolyte substantially occluding the interior volume of the porous structure to provide ionic conductance. The Applicant claims a polymeric membrane comprising a polymeric sheet comprising porous structure with a microstructure of nodes and fibrils and an interior volume of the porous structure between the nodes and fibrils, the sheet having distributed in the nodes and fibrils of the sheet a metal, an organic polymer, or a combination, and interior volume is substantially occluded by an ion-exchange resin to provide ionic conductance, wherein sheet is expanded porous PTFE.

In the prior art of record, Ohashi et al., EP 0503147, teach a polymeric membrane comprising a polymeric sheet comprising a porous structure, a fluorinated polymer coated on the inside of the pores, and a metal film formed on the polymer coating. Murphy, US 6,059,943, teach a polymeric membrane comprising a polymeric

matrix filled with inorganic oxide particles. Koslow, US 5,147,722, teach a polymeric membrane comprising ion-exchange resin.

Thus, the prior art of record, taken either alone or in combination, fails to disclose or render obvious, an integral polymeric membrane comprising a polymeric sheet comprising porous structure with a microstructure of nodes and fibrils and an interior volume of the porous structure between the nodes and fibrils, the sheet having distributed in the nodes and fibrils of the sheet a metal, an organic polymer, or a combination, and the interior volume of the structure comprising a porosity of the sheet of the polymeric sheet greater than 35% and substantially occluded by an ion-exchange resin to provide ionic conductance. Nor does the prior art of record disclose a polymeric membrane comprising a polymeric sheet comprising porous structure with a microstructure of nodes and fibrils, fumed silica distributed in the nodes and fibrils of the sheet, and electrolyte substantially occluding the interior volume of the porous structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
